## What is Meet the Artist?

**Meet the Artist program enhances learning in our children.**

You may wonder why we have “**Meet the Artist**” when our children already have art as a resource. **Art education** provides the foundation for **visual perception** and **develops problem solving** and **abstract thinking skills**. It also provides an **insight to history or social studies** by introducing other people, cultures, places and time periods. **Doing the art projects reinforces other subjects:** *language arts* (read directions), *math* (pattern and geometry), *science* (color spatial awareness), *physical education* (motor skills and eye hand coordination) are just a few of them.

Meet the Artist complements what the art class is teaching the children while introducing them to some famous artists and builds an appreciation of art as they grow older. This program integrates some facts about different techniques and certain artists, followed by an easy art project that will reinforce the style that was indicative of that artist.

**Can you draw a crooked line?**

**Cut and paste paper?**

**Praise creativity?**

**Available for 1+ hour(s) four times during the school year?**

**Then you are the perfect volunteer for Meet the Artist!!**

**The teachers, children and PTO appreciate your time and effort!!**

The program this year involves presenting four artists or genres.

***You do not need to have an art or teaching background, just a willingness to have fun.***

As you present your artists, you too will learn how crooked lines, bright colors and surrealistic views of people, things and places bring out the artist in you. You can partner up with another parent or ask one of us on the committee to help you through the first power point.

***WE LOVE VOLUNTEERS!***
