UNIT 1: RADICAL REACTIONS

Get ready for some serious hands-on chemistry! Young scientists will mix, bubble, and react their way through the fundamentals of matter and chemical changes. From unexpected temperature twists to colorful polymer creations, students will learn how molecules interact.

UNIT 2: EERIE EXPERIMENTS

Uncover the science behind the supernatural! Students dive into glowing bioluminescence, spooky state-of-matter shifts, and mysterious physical phenomena. Through thrilling, safe experiments, kids will explore dry ice, optical illusions, and ghost-like chemical reactions!

UNIT 3: BIOLOGY BRAINIACS

Step into the boots of a field biologist and neuroscientist! Students will explore the hidden building blocks of living things, from unlocking genetic codes to testing how our amazing brains process sensory signals. It's a fascinating journey into what makes life work!
