

AFTER-SCHOOL ROBOTICS CLUB

New Lego
Robots Every
Week

Held right at
your child's
school!

Only
\$25/class

Unit 1: Service Vehicles

Sirens on! Students build their own fleet of hardworking machines, from an ambulance to a forklift to a fire truck, then bring them to life with motors and drag-and-drop code.

Unit 2: People in Motion

Let's dance! Students engineer builds that mimic how people move. They'll experiment with motors, motion, and simple programming loops to make their creations walk, groove, and react.

Unit 3: Winter Wonderland

Snowy builds! Students will design and program a winter world of their own, including a snowman, snowmobile, snowboarder, and a light-up tree.

Reserve your spot!
