

LPA Families,

We have flipped our car loop (Parent Drop-Off and Pick-Up) and our bus loop. Please pay close attention to the signs that will be on Russell Sampson Road directing you to the correct parking lot area for arrival and dismissal locations for students.

We have added a new sidewalk area and new gate off Russell Sampson Road onto our campus for our students that walk or ride a bike from the Heritage Oaks subdivision. Students from this subdivision will enter and exit the campus using the new gate and sidewalk area located in blue on the attached map located in the bus loop area. There is a new bike rack located in the playground area of the 200 building. Students will walk their bikes from Russell Sampson Road onto the school campus and place their bike in the bike rack. Please remind your child to walk their bike onto and off the school campus. Students are not allowed to ride their bikes while on the school campus during arrival and dismissal times. All students using this new sidewalk area will enter and exit the building through the doors at the 200 building during arrival and dismissal times. An LPA staff member will be present at arrival and dismissal to help supervise students.

Students that live in St Johns Forrest and walk or ride their bike will continue to enter and exit the campus at the sidewalk area off Russell Sampson Road at our car loop. We still have the bike rack area in the same location and will continue to provide a staff member at the crosswalk area of the car loop to help students safely cross this area. Please remind your child to walk their bike onto and off the school campus. Students are not allowed to ride their bikes while on the school campus during arrival and dismissal times. Students will enter the campus using the car loop doors.

Our Car Loop location has been flipped to the old bus loop side. Please enter the campus off Russell Sampson Road and loop around the receiving area as drawn in blue on the attached map labeled Car Loop.

We are looking forward to these changes as we continue to improve and make our campus safe for our children.
